Ophthalmology

Chairs that optimize
eye exams and eye surgeries

CE ISO 9001
ISO 14001

Designed and manufactured in Denmark since 1935

Stools

VELA Samba 520

- :: Small and compact stool **ideal for shorter, sedentary work**
- :: Adjustable ergonomic backrest promotes an **active seating position** and **allows the shoulders and arms to move freely**
- :: Compact design makes it **easy to move around** while sitting
- :: The seat height is easily adjustable

VELA Samba 500

- :: Compact stool without backrest, **easy to store under a table** when not being used

VELA Samba 420

- :: Saddle seat stool with narrow, adjustable backrest provides **ergonomic seating positions** for varying sedentary work
- :: Provides **seated mobility** while performing different tasks
- :: Saddle seat with a tilt gives an **open hip angle** and promotes an **active, erect seating position**
- :: Compact design makes it possible to **sit very close to the equipment, device or patient**

VELA Samba 400

- :: Stool with saddle seat **promotes a good working position and prevents a stooping posture**

Staff chairs for examinations

VELA Samba 150

Item no. 80143

VELA Samba 150

- :: Extra short seat with a tilt allows **close access to the bed** while **avoiding a bent-over working position**
- :: Adjustable backrest **supports an active sitting position** and provides free movement of shoulders and arms
- :: Seat **relieves pressure on the seat bones** and increases comfort using different foam types and a **pressure relief zone** in the centre of the seat
- :: Ergonomic design and rounded seat edge **enables staff to sit for long periods in the same position** while maintaining **good blood circulation in the legs**
- :: Ideal for work that involves switching between sitting and standing positions

VELA Latin 100

Item no. 80131

VELA Latin 100

- :: **Easy adjustment of seat height** and tilt as well as backrest settings for **active seating positions** that promote movement
- :: Ergonomically shaped seat and backrest that **support and promote good posture**
- :: Easy-to-read pictograms on the chair handle assist **quick and easy chair adjustment**

All chairs and stools are available with different types of wheels and foot-operated height adjustment.

Hygiene Benefits

VELA medical chairs are designed to meet the stringent hygiene and disinfecting requirements in the healthcare sector

- :: For optimal hygiene, chairs have easy-to-clean surfaces without recesses where dirt might gather, including the underside of the chair
- :: All backrests are supplied with edge bands to prevent dirt collecting in the joints
- :: The chairs have easily cleanable surfaces without any recesses, where dirt might gather
- :: All parts can withstand disinfection, for example, with alcohol or chlorine at the recommended concentration and mixing ratios
- :: Light-coloured surfaces make it easy to spot marks when cleaning

Distributor Details:

Danish quality

VELA is a Danish family-owned company founded in 1935 by Verrmund Larsen. VELA is headquartered in Aalborg, Denmark and has its own development department, and production and padding workshop. In order to be close to our customers, we have a strong, international dealer network.

CHAIRS DESIGNED WITH CARE AND PRECISION

The development department at VELA is constantly focused on optimising safety, functionality and ergonomics in cooperation with health professionals.

We take into consideration that chairs in the healthcare sector are exposed to severe wear and tear for many hours each day. At VELA, we use hard-wearing mechanical parts and extra-durable seating materials to keep the chairs clean and functional for many years. All VELA chairs are CE marked and made in Denmark.
