The pack includes 1 RS-OIL ECS 5700, in a polymeric syringe, for long-term replacement of the vitreous humor extracted during vitreoretinal surgery, and 1 ECT connection tubing. Product warrants a stable tamponade over the time and reduced incidence of complications. The ready-to-use syringe, made of inert, plastic and silicone oil compatible material, connects to Millennium™, Stellaris® PC by means of the ECT connection tubing, and increases patient safety by reducing the risk of breakage during handling or surgery.
